

Web Mapping Applications

933 Mobile Dr. | [Click here for map](#) [1]

****Note:** All web mapping applications are best viewed with a screen resolution of 1440 by 900 pixels. If your resolution is lower, you may not see some items. Internet Explorer 7.0 and Firefox 3.0 are the supported web browsers. Newer versions may cause unexpected results.

GIS WebMap Interactive

The GIS WebMap Interactive site is a web-based map system that lets you have Longview at your fingertips. WebMap Interactive pulls together information and data from a variety of sources, and puts it into maps you can view or print. It's not your average road map either. There are dozens of features you can turn on and off with the click of a button. WebMap Interactive doesn't just offer street names and intersections, for example it can show you:

- Property Lines
- Zoning Information
- Addresses
- Public Places
- Much More

Need zoning, property or street information for building or renovating? Thinking of moving and not sure where the schools are located? Trying to remember exactly where that great looking park is located? Have an appointment and want to make sure you get to the right place? WebMap Interactive can show you. Look for more great features to be added in the future. Please be patient, the site can take some time to load.

GIS Water and Sewer Viewer

This GIS Water and Sewer Viewer is the site that will allow you to search, view, measure, and print information about water and sewer infrastructure as well as other City map layers. Please be patient, the site can take some time to load.
